

DIDSBURY PIONEER

VOL. XX No 25

DIDSBURY, ALBERTA, THURSDAY, JUNE 25, 1931

\$2.00 per Year. 5 cents a copy

Presentation Rev. A. E. Hayes

Owing to the inclement weather last Wednesday, the United Church held their picnic indoors and the kiddies spent an enjoyable afternoon playing games in the old church.

After lunch, Rev. A. E. Hayes was presented with a purse by Mr. H. W. Chambers on behalf of the congregation. A purse was also presented to Mrs. Hayes. Mr. Hayes then made a suitable reply.

Dr. Clarke spoke a few words in appreciation of the good work accomplished by Mr. Hayes since coming to Didsbury. Mr. N. S. Clarke also spoke and mentioned how Mr. Hayes had been instrumental in building the new church and putting the United Church at Didsbury on a self-supporting basis.

The good wishes of the management and congregation go with Mr. and Mrs. Hayes for the success of their future work at Bon Accord.

Rev. A. E. Hayes preaches his farewell sermon in Knox Church on Sunday evening and a cordial invitation is extended to all.

Crop Prospects Much Better

The crop conditions since the rains of the last two weeks are much better throughout the province and it is now expected that there will be a fair crop in this district. The pastures are showing great improvement and stockmen are now assured of sufficient feed.

Rainfall in excess of four inches is reported during the last two weeks.

BIRTHS

On July 10th to Mr. and Mrs. C. Pratt, a son.

On July 18th to Mr. and Mrs. M. E. Archer, a son.

Council Meeting.

A meeting of the town council was held Monday evening, with Mayor Chambers in the chair. The councillors present were: Messrs. Adhead, Barrett, Fisher and Pitt.

Estimates for the year were considered, with the object of striking a mill-rate at the next meeting. It was pointed out that the council are making a considerable reduction in public works this year and are endeavoring to keep the expenses down to a minimum.

The mayor was appointed delegate to the convention of the Union of Alberta Municipalities which will be held at Calgary on June 25th and 26th.

It was decided to remove the fire apparatus from the Teskey Garage where it has been kept for some time, to the Adhead Garage. It was reported to the council that the damage had been done recently to both public and private property by boys. The secretary was instructed to get the juvenile officer to make investigation and the offenders will be severely dealt with.

Degree Competition.

A Competition of Degree work was held at the local Rebekah Lodge, on Friday evening, when Innisfail and Didsbury lodges compete for the District No. 10 cup. Innisfail was successful in winning the cup by a narrow margin of 2 per cent. The judges complimented both degree captains on the high standard of work exhibited by both teams.

After the competition the members sat down to a splendid supper provided by the home lodge. During the evening the Noble Grand Mrs. Hunsperger, made a presentation to Mrs. Terry, who has been a faithful worker in the order and who is now leaving to reside in Calgary.

LOCAL & GENERAL

Didsbury Local U.F.A. will hold a meeting on Saturday afternoon, June 27th at 2:30 in the old Presbyterian Church.

Among the fans who accompanied the ball team to Trochu on Monday were: Mr. and Mrs. J. Fleury, Mr. and Mrs. J. W. Halton, Miss R. Clements, Miss L. Knudsen, Mr. Ross Ford and Mr. W. McInnes. They report not only having enjoyed the game, but having had a good social time while at Trochu.

Rev. Roppel and family intend leaving here next Wednesday by auto for their new appointment in Rosthern, Sask., the distance of about 60 miles in a north-westerly direction. The town, which has about 1800 of a population, is situated on the main highway between Prince Albert and Saskatoon, 30 miles from the latter.

BASEBALL

Didsbury baseball team visited Trochu Monday night and after a wild batting spree returned home on the long end of the score, 20-5. The locals got seven runs in the first frame, were held down in the second and third, then scored in every remaining inning. Scotty Lee got a home run, Gooder a three bagger, R. Berscht and Cook each got a pair of doubles and Lee Russell one. Every man on the team hit safely. The boys found Trochu a real ball town and enjoyed a fine trip.

Didsbury and Olds meet in the last league game at Didsbury tomorrow (Friday) evening.

FOOTBALL.

On Saturday last at Bowden the Didsbury team were outclassed and Bowden ran up a score of 41-0. The Didsbury team showed lack of shooting practice, but the game was more evenly matched than the score indicates.

Last evening (Wednesday) the same teams met at Didsbury and the game was pretty evenly matched. Bowden opened the attack and after several futile attempts Larsen landed a hot one in the corner which beat Robinson. The local boys lightened up and at half-time the score was 1-0 in favor of Bowden.

The second half was evenly played. Larsen scored again in the first five minutes, but for the rest of the game Didsbury did most of the attacking and Edwards reduced the arrears for the homesters shortly before the final whistle.

Both games were Rosebud League fixtures. Another league game will be played Saturday when Eagle Hill are the visitors. Kick-off 7:30 p.m.

PAT BURNS TO RECEIVE A GIGANTIC BIRTHDAY CAKE

A huge cake weighing 3,000 pounds and 7 feet 6 inches in height has been made for the Calgary Exhibition and Stampede this year and presented to Pat Burns, pioneer rancher and cattleman, on the occasion of his 75th birthday on July 6th.

The cake, which will be surmounted by 75 candles, is to be cut into 25,000 pieces and distributed to visitors at the Stampede on the opening day of the fair. The ingredients consist of 285 lbs. of sugar, 304 lbs. of butter, 380 lbs. of flour, 12 lbs. of spices, 290 lbs. of currants, 1,450 lbs. of raisins, 190 lbs. of mixed peel, 190 lbs. of cherries, 80 lbs. of almonds, 80 lbs. of walnuts, 120 lbs. of dates, 60 lbs. of candied pineapple, 24 lbs. of salt, and 380 dozen eggs. For the icing there will be 160 lbs. of icing sugar, the whites of 340 eggs, 300 sugar roses, 200 sugar lilies, three gross of leaves.

The cake is made in three sections each a square, placed in tiers one on the other.

Community Picnic On Dominion Day.

Change In Trains.

A change in the C.P.R. timetable is effective next Sunday and trains will leave Didsbury on the following schedule:

Northbound—
No. 521 Daily 2:40 a.m.
No. 523 .. Ex. Sunday 10:18 a.m.
No. 525 .. 6:01 p.m.
Southbound—
No. 522 Daily 4:48 a.m.
No. 524 .. Ex. Sunday 12:39 p.m.
No. 526 .. 5:30 p.m.

The most notable change will be in evening trains, the southbound leaving at 5:30 p.m. and the northbound at 6:01.

It will now be possible to go to Calgary on the noon train, return on the afternoon train and have two hours in Calgary for business. It will also be noted that the Sunday trains will both be evening trains.

Local Hospital Day Postponed to July 3rd

On account of the inclement weather and bad state of the roads, the Hospital Day which was to have been observed at the Didsbury Hospital Friday last has been postponed until Friday, July 3rd.

The hospital will be opened on that day for inspection by the general public from 1 to 5 p.m., when the matron and nurses will welcome all who care to attend and will be glad to answer any questions regarding the operation of the institution. Tea will be served by the staff from 3 to 5 p.m.

Obituary.

WALTERS

The death of William Walters occurred at the hospital in Calgary on Sunday morning. Mr. Walters who was 47 years of age had been in poor health for some time, was taken to Calgary the previous Tuesday.

He was born at Prince Edward Island and was a veteran of the Great War. He came to Didsbury about three years ago and was in charge of Mrs. Harmer's fox ranch, east of town.

The funeral was held in Calgary on Monday.

Everyone in the district is expected to be at the Community Picnic, on Wednesday, July 1st. The program has been arranged and is equal to any that has been put on. Noon time is an excellent time to visit with your friends and neighbors, so bring your lunch baskets and have dinner in the grove. You will be supplied with free coffee or lemonade.

The children will be supplied with ice cream free of charge and they are sure to have a big time so bring them along. There will be no charge at the gate as this picnic is being given by the business men of the town and everyone will be made welcome.

In the evening there will be a picture show run continuously from 6:30 to 9:30 o'clock, when "Father's Son", will be shown. After the show a dance will be given with the "Old Folks" Orchestra supplying the music.

Herald Trophy Finals.

A number of local golfers attended the finals for the Herald Golf Trophy held at Red Deer Sunday last. Among those who attended were: Messrs. A. C. Fisher, Geo. Julien, M. Hugel, J. McInnally and E. G. Ranton.

Dr. Wagner, of Innisfail won from L. Welliver, of Red Deer by one stroke, for the series, the score being: Wagner 310, Welliver 311. Sunday's scores were: Wagner 84, Welliver 86. A large gallery followed the players and enjoyed an exciting game which was won on the eighteenth green.

WARNING.

Several complaints have been received by the Council, that in the past few weeks a lot of damage has been done to public and private property in the town.

In the future any case of this kind will be severely dealt with and parents are urged to caution their children against throwing stones at automobiles or breaking window panes, etc.

By the order of the Council.

FALL PASTURE

(Experimental Farms Note)

The period of juicy pastures is brief in the Prairie West. Drying winds and frosty nights soon scorch the grass. Much cows reflect this condition in a decreased lactation. Maintenance of the autumn milk flow is crucially important in securing a profitable winter production. Succession is also important for lambs and swine.

So far as meadow pastures are concerned a mixture of home grass with sweet clover or alfalfa serves best, though the sweet clover is but a biennial, while the alfalfa weakens and perhaps kills out if persistently grazed in the autumn.

Supplementary pasture crops are winter rye, late-sown oats, and rape.

Of all field crops on the Beaverlodge Sub-Station winter rye is the last one to stand in autumn and the first one green in spring. It is also winter-hardy, enduring fairly close autumn grazing yet surviving the average winter with but moderate chance of killing. A few acres near the barn are a boon in lambing time, the grazing season. If summer pasture is desired the rye may be seeded in June or even in May. For autumn grazing late July seedling will do. Trouble from volunteer seed need not be feared unless the crop is left to produce grain.

On the less frosty lands oats seeded in July sometimes remain substantially green until mid-October, promoting a satisfactory flow of milk. However, the length of time the oats may escape killing frost is very uncertain and for this reason oats are much less dependable than winter rye as a fall pasture.

A pound or so of rape seed may now be drilled with a late-sown crop of grain will sometimes afford quite a tasty nibble to animals grazing the stubble. The growth of rape thus seeded will seldom be rank enough to occasion trouble from blight, but the little that is produced is good. Years ago the writer fattened a team of old oxen on such rape-sprinkled stubble, supplemented by sheep feed. They made very fair eating as oxen and beef goes. It was not quite like baby beef, but compared favorably with the tough old mose meat one sometimes runs across.

KILL SOW THISTLE

In conversation with the Peaches, Mr. H. B. Moore stated that he had killed completely a patch of about one acre of sow thistle.

The plants were good thrifty plants and in going over his field in August, 1929, he came across this patch. He went at it with a disc and worked it about ten or twelve times, cutting the plants and roots deep down.

The patch was completely plowed up, no thistles appeared last year, nor are there any this year in the patch.

Mr. Moore believes that cutting them up completely in August will do the trick. It is certainly worth trying.

LOCAL & GENERAL

Picnic dance at Community Hall, Wednesday, July 8th. Bowden's 5-piece orchestra.

Mr. Jas. McDougall went to Calgary last week to take part in the Scottish 110 golf tournament.

Mr. C. E. Reiber went to Calgary on Monday to attend the funeral of Mr. W. Walters.

Mr. and Mrs. E. Marodius were visitors at Oketoks and Turner Valley on Sunday.

Miss Jago, of Lacombe who was formerly a teacher at the Didsbury school was a visitor at Mr. and Mrs. H. M. Reiber's last week-end.

"Marsden" at the Opera House, tonight (Thursday). Revealing the amazing things a woman will do for love. 25c.

English Watches, Grandfather Clocks, and Chimes. Everything Ancient and Modern. Bring it to W. Monteith, North End Jeweller.

Mayor H. W. Chambers will go to Calgary Thursday to attend the convention of the Union of Alberta Municipalities.

Calgary Exhibition And Stampede, July 6th to 11th

The Calgary Exhibition & Stampede to be held July 6th to 11th will be the greatest combined exhibition and old-timers' celebration ever held in the West. The exhibition will include over 9,000 entries, including a wonderful exhibit of livestock. The attractions and special features are the best ever arranged for.

The greatest interest is being taken in the 75th birthday celebration of Mr. P. Burns, Alberta's leading stockman, which takes place on the opening day of the exhibition and stampede.

A committee of Mr. Burns' friends is arranging to tender him a banquet at the Palliser hotel at 8:30 that evening when an oil portrait of himself will be presented.

A number of new features have been included in this year's exhibition and stampede, the outstanding one being the Grand Livestock Review to be held Friday morning.

Free tickets will be sent to all school children 15 years or under within a radius of 50 miles of Calgary and teachers residing outside that area may obtain tickets for their students of that age by writing to the exhibition manager. Eight prizes will be given away, four to girls and boys 9 years or over and under 16 years and four to children 8 years and under. Children under school age will be admitted free to the grounds and tickets will be given them at the grandstand. Adults will pay the regular admission charge to the grounds, but admission to the grandstand that morning will be free to everyone. The high jump will be judged, also the heavy four and six horse teams and the livestock parade will be the finest ever seen in Calgary. The prizes have been donated as follows: Purebred Dartmoor Pony from the Prince of Wales Ranch, by Burns & Co.; Sheldahl Pony by North Star Oil Co.; Two Purebred English Setter Dogs by Ontario Laundry Ltd.; and a trio of poultry from each of the following: S. E. Barth, C. J. Ford, K.C.C., George Corn and Jas. S. Smith. An attendance of at least 20,000 is expected to take part in this program.

Another new feature is the marvelous Bari Chinese Exhibition which was attended by 150,000 people at the Toronto Exhibition during the past two years.

Entertainment features include: The Stampede, greatest of them all; Running Races; Band Contest; Stampede Parade; Mammoth Firework Display, Saturday night; Cowboy & Old-timers' Ball, Friday night; Morning Indian Street Parades; The Special Feature Production, "The Fiesta of 1931," with over 100 artists.

Special passenger rates of fare and a quarter will be in force from Saskatchewan, Alberta and B.C. mainland points. Hotel or private room accommodation may be obtained through the Free Accommodation Booth at the C.P.R. station. This outstanding event provides a unique opportunity for a holiday at the exhibition and at Canada's beautiful mountain resorts, Banff and Lake Louise.

Huge Jackfish Washed Up In Rainstorms

During the heavy rain and wind storm which raged at Three Hills last Thursday night, a huge pike, three feet in length and weighing exactly twenty-one pounds was washed up on the shore at the north end of Keiver's Lake. The big jack was discovered by a farmer near whose land the lake is. This is the first fish of any description ever to be found in the lake. Up to now the opinion locally was that about all the lake ever held was weeds and frogs.

The local rod and stream fans have been travelling some distance away to get their fish, but now, with the discovery of big fish the lake promises to be a popular resort.

H. A. HOWARD,
Manager.

A recent official report states that over 55,000 lbs. of the eight-armed octopus were caught in 1928 and over 25,000 lbs. in 1929. The fish is eaten chiefly by Orientals in British Columbia and brings between five and ten cents a pound on the market. The catch is the incidental product of other fishing operations.

The Harvester-Thresher Savings Investment Plan

Makes It Easy For You to Own a McCormick-Deering Harvester-Thresher

Under This New Plan Every Responsible Grain Grower Can Pay for His McCormick-Deering Out of a Part of the Savings His Combine Will Make

CROP production cost figures compiled by McCormick-Deering Harvester Thresher users show a saving of from 15 to 20 cents per bushel as compared to the binder method of harvesting.

We are so confident that thousands of Canadian grain growers can make proportionate savings with a McCormick-Deering Harvester-Thresher that we have announced the MCCORMICK-DEERING HARVESTER-THRESHER SAVINGS INVESTMENT PLAN. By taking advantage of this plan, you or any responsible grain grower can purchase a combine now and practically pay all the cost out of the savings you will effect during the next three harvests.

Under this plan you get a time-tried and time-tested combine backed by 18 years of field experience. The details of the plan have been given to all McCormick-Deering dealers. Go to the dealer in your town and ask him about it, or write directly to us if you prefer

The West's Besetting Sin

If there is one besetting sin indulged in by the people of Western Canada it is the sin of idleness. Living in a new country, a country which fifty years ago was given over to roving bands of Indians and immense herds of buffalo, our people today, expect and demand all those services and conveniences which it has taken centuries to build up and develop in older lands. It is a good fault to want the best there is in life for our children; it is a laudable ambition to work to secure such things; a proper spirit of discontent is all right, provided it is a proper spirit.

But in a vast extent of territory over which population is as yet but thinly spread, where the element of time has not yet permitted that degree of productive development which leads to the accumulation of certain reserves of wealth, for people to expect to enjoy all those things which it is possible for older countries of large populations and centuries of accumulation to provide for their people is not reasonable. Whatever we have must be paid for, and if in the West we have not sufficient people nor sufficient wealth to pay for what we want, we must of necessity go without until such time as we are able to provide them. And to be discontented with our lot in the meantime is neither reasonable nor right.

For example, Good all-weather highways to serve all parts of Western Canada is the desire of everybody. It is a laudable desire. Efforts to realize it are being put forth, but people are impatient and demand still larger programmes of construction, notwithstanding the fact that it is taxing their resources to the utmost to pay interest charges on past construction and finance the carrying out of existing programmes of new construction.

There is nothing to be gained, and much to be lost by having the whole country criss-crossed with good roads, provided with telephone and electric power services, equipped with churches, schools and hospitals, and other services and conveniences now so generally regarded as necessities, if as a result of providing them the burden of taxation is so heavy as to drive the people off their land. All these things are worse than valueless if the people cannot maintain an existence to enjoy them.

To cite another example. Within the past two years there has been erected and equipped, in the Province of Saskatchewan, three technical schools, one at Regina, a second at Moose Jaw, less than 50 miles distant, and a third at Saskatoon, 150 miles away, each of which has cost half a million dollars, or a total of \$1,500,000. This large expenditure for purely technical education has been made in a Province where over 70 per cent. of the population lives in rural communities, and where constant stress is laid on the importance of educating the youth to remain on the land.

The point is not that technical schools are not good and desirable things. No, the point is, we are not aiming to provide these good things before we can afford to do so, and to the extent that we mortgage our future in this way, are we not crippling our own efforts to provide and maintain something else much more essential and which would benefit a much larger percentage of all the people who have to bear the taxation burden? Are we not trying to ape other and older lands in our impatience to have everything they have, which we doubt they can afford now after long decades of growth, but which we cannot afford because we are not numerous and wealthy enough to carry the resultant financial burden.

Few men and fewer women there are but would like to live in a better home than they now occupy, if they could afford it, but knowing they cannot afford it they make the best of what they have. Many of them could have the finer house of their dreams if they were prepared to mortgage their whole future for it, and, while living in it, denied themselves other things and lived in a state of worry over the payments to be made.

The point is just an aggregation of individuals. They can have these things they now occupy, if they could afford it, but knowing they cannot afford it they make the best of what they have. Many of them could have the finer house of their dreams if they were prepared to mortgage their whole future for it, and, while living in it, denied themselves other things and lived in a state of worry over the payments to be made.

It is in times like these that heed should be given to such matters. The present is hard for most people, and in no small degree because of the mistakes of past, made individually and collectively. This present depression will pass; good times will come again. We must willingly be patient now. But will the old impatience come back with renewed force? Will we as a people still insist on running before we really are able to walk? If so, we will stumble again and fall once more.

Receives Medal

Wing Commander Charles Kingsford-Smith was awarded the Oswald Watt medal for the most conspicuous feat performed in 1930 by Australian-born fliers. The Australian Aero Club presented him with the medal for his flight from head from frequent bumps. The flier, who had been flying since last June.

Protection For Miners

Safety caps and safety shoes are soon to be added to safety lamps as standard equipment in the Cape Breton collieries. The caps are of horn, flares. The Australian Aero Club presented him with the medal for his flight from head from frequent bumps. The flier, who had been flying since last June.

Was Weak and Run Down Could Scarcely Do Housework

Mrs. Edward A. Allen, Beaman, Alta., writes: "I would like to tell you of the great benefit I have received from your Milburn's Heart and Nerve Pills. I was feeling very much run down in health, and was so weak I could scarcely do my housework. In fact, I would have to be taken in the afternoon for an hour or so. I saw your Pills in the drug store and took a box home with me, and I was delighted with my renewed strength. I have recommended them to a neighbor and feel sure they will help her too."

Price 50c a box

Sold by all drug and general stores, or mailed direct on receipt of price by The Milburn Co. Ltd., Toronto, Ont.

Unusual Cafe in London

Automatic Machines Will Serve Meals In Recent Time

Five-minute meals will be the order of the day when London's latest speed restaurant is opened in the Strand. No diet will cost more than sixpence, and all foods will be served through automatic machines. Solid plates will be slipped into letter-box-like slots, and there is an ingenious arrangement by which customers can wash and sterilize their own glasses. "Soft" drinks, supplied through automatic machines may be aerated, if desired.

Customers simply slip their still drinks into a little machine, press a button, and the "soft drink becomes sparkling."

Because of regulations alcoholic beverages cannot be supplied through an automatic machine, and a barman has been employed to look after this department. Here, also, the highest price will be sixpence.

The restaurant is to be open day and night, week days and Sundays.

SAVED IMPORTED DRESS

"After a little wearing, a lovely green voile—an important dress—lost color so completely that it was not wearable. A friend who had admired it asked me why I wasn't wearing it any more. On hearing the reason, she advised dyeing it and recommended Diamond Dyes. To make a long story short, it turned out beautifully and evenly. They never spot, streak or run, and friends never know the things I dye with Diamond Dyes are redyed at all."

Mrs. R. F., Quebec

Recipes For This Week

(By Betty Barclay)

GOLDEN COCONUT SHORTCAKE

8 thin slices sponge cake.
 Orange sauce.
 3 oranges, sections free from membrane.
 1/2 can coconut, southern style.
 Allow two slices sponge cake for each serving. Place first slice of sponge cake on plate, cover with orange sauce, orange sections, coconut and additional orange sauce. Cover with second piece of sponge cake and top with orange sauce and orange sections. Sprinkle with coconut. Garnish with whipped cream around base if desired. Serves 4.

STRAWBERRY WHIP

1 package strawberry-flavored gelatin.
 1 cup boiling water.
 1 cup strawberry juice.
 1 cup strawberries, crushed and drained.
 1/2 cup sugar.
 Dissolve gelatin in boiling water. Add strawberry juice. Chill. When slightly thickened, beat with rotary egg beater until of consistency of whipped cream. Fold in strawberries and sugar. Turn into mold. Chill until firm. Unmold. Serves 8.

Asthma Is Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvelous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

World's Smallest Dog

The world's smallest dog is said to have been acquired by the Maritzburg Museum. It is a dwarf brown and white pointer, and although it lived for three years it never grew longer than six and half inches from nose to tail tip. Its head was one and a quarter inches long and an inch broad, and its hind legs were slightly less than two inches long.

Someone has succeeded in carving 100 words on a grain of rice. We are in hopes it includes directions as to how to cook it. So few people can cook rice.

Serious Rectal Troubles Often Caused By Harsh Cathartics

ENO'S FRUIT SALT

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

Rubber Lining Protects Steel

Perfected Surface Resists Abrasion Under Most Severe Conditions

When chemists discovered a method for attaching a rubber lining to a metal surface, they presented a new and valuable material to the chemical engineer for use in the vats, tanks, pipes, pumps, and so forth, in which he handles corrosive liquids. The rubber lining effectively resists the action of acids which would soon eat through the steel. Now this process of attaching a rubber surface to metal has been perfected to a degree which encourages its use to resist abrasion in some of the most severe service conditions imaginable. Popular Science.

An Odd Electrocuton

Physicians at Fergus Falls, Minnesota, said that Wilbur Thompson, 39, highway workman, was killed by an electric shock, although his body did not come in contact with any electricity. Thompson was driving a grading machine beneath a heavily charged power wire on a highway near here. The current jumped from the wire to the metal button on Thompson's cap and electrocuted him.

Miller's Worm Powders are the medicine for children who are found suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms subsist and drive them from the system, and, at the same time, they are tonic in their effect upon the digestive organs, restoring them to healthful operation and ensuring immunity from further disorders from such a cause.

One reason why the scenery seems more wonderful in Europe is because you don't have to read it.

Canada Should Have

Right To Amend Constitution

Conference With Provinces May Be Called To Discuss This Matter

A resolution declaring that Canada should have the right to amend the own constitution, moved in the House of Commons, brought from Hon. H. G. Guthrie, Minister of Justice, the statement that he favored a conference with the provinces on this important matter. Before calling a conference, however, he thought that a committee of parliament should be appointed to consider this question.

"I am by no means hopeless of the situation," Mr. Guthrie declared to the House. "I am entirely hopeful, and I think it would be well for this parliament, if not at this session, at some subsequent session, to appoint a committee especially charged with the consideration of this question. We must prepare our case here before we call a conference, and it is a case that will require a great deal of preparation."

"After preparation had been made," added Mr. Guthrie, "I shall heartily favor the summoning of a provincial conference with the Dominion authorities to see what plan can be worked out so that in the future this parliament may be able to make the necessary amendments to our constitution."

Well-Protected Animal Park

Elk Island National Park in Alberta, which contains one of the Government's best herds, is entirely surrounded by thirty-four miles of nine-strand sixteen-foot wire fence, fire-guards, buffalo feet in width, are ploughed about the park, both immediately inside and outside the fences.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper. Your grocer, druggist or stationer has Para-Sani in the handy sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

Imagination Cannot Grasp The Progress The World May Make In The Vista Of Future Years

To those who sometimes express the wish that they might return to life one hundred years hence to see what the world looks like, the prophecy of Sir James Jeans that they will last for about one million million years makes their wish seem a very trivial thing.

It is only twelve thousand years since mankind was living in the stone age. It was only after the advent of the steam age in the early part of last century that scientific progress began to make any headway. Today, steam has very largely been displaced by electricity. And electricity itself is only in its infancy. Scientists do not even know what it is. Tomorrow, electricity may be a back number. When man harnesses the atom—and he is trying hard every day—the world may be completely revolutionized. A single atom may drive the new Canada liner across the Atlantic in a few hours. Human beings may be projected in steel cases from here to Australia. All present day machinery may be as obsolete as the implements of primitive human beings.

Millions of years before the Jeans' prophecy is put to the test inhabitants of Earth may take trips to Mars and other planets, and vice versa. When we get there the Martians may have something to show that we do not dream of. Perhaps they will discover these secrets before we do and surprise us by dropping in on us one day.

It all staggers imagination. Those who believe in reincarnation must rejoice at the prospects.

Investigate Radium

Royal Inquiry Into Use Of Radium Treatment Will Be Held In Ontario

The appointment of Canon H. J. Cody, of Toronto, to head a royal inquiry, by the province of Ontario, into the use of radium as a treatment for cancer, was announced by Premier George S. Henry. As associates on the commission, he will have Professor J. C. McLennan, of the University of Toronto; Dr. W. T. Connell, of Queen's University, Kingston; Arthur Ford, managing editor of the London Free Press; and Hon. Dr. J. M. Robb, provincial minister of health.

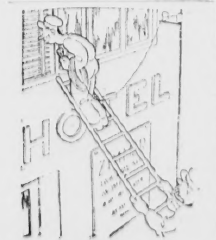

Many Orders For Bees

Over Thousand Applications For Packages Received From Saskatchewan

Considerable expansion of the bee-keeping industry in Saskatchewan is indicated by the orders received for packages of bees, according to R. M. Pugh, Provincial Apiarist. To date, 1,041 applications or orders have been received as compared with 669 at the corresponding date last year. In predicting that importations would be at least 50 per cent. greater than last year, Mr. Pugh stated that a considerable proportion of the applications had been received from new beekeepers.

Contrary To Opinion

Men are more impulsive than women a Memphis newspaper editor found after queries to his information bureau had been totaled. It was found that of the 265 questions asked, 125 were from men, and the remainder from women.

"Ede, come down, it is five o'clock!" "I don't care. I am working overtime today!" The Musketeer, Vienna.

W. N. U. 1891

Times Have Been Harder

Only Thirty Years Ago and What a Difference

We still get the party who exclaims "These are tough times!" Tough times? Well, well! We read a reminiscence from 1900, the heyday of the bicycle, which notes that there was then in the country a bicycle to every seventy people. And in 1931 we are nearly at a figure of one automobile for every four people!

Horses? Umph, horses! In 1900, the census reported 25,000,000 horses and mules in the land, worth about \$100 each. Our present 26,000,000 registered automobiles are stated to be worth anyhow an average of \$350 each. And, take it or leave it—for so the 1930 U.S. statistical abstract declares—the country still possesses 19,000,000 horses and mules!

Nough times? What about roads. Too meagre of figures. As we know roads today there were none in 1900—absolutely none, except railroads. The country lad who in 1900 returned home from a trip to Detroit had an audience for a month to hear tell about it. Now, it isn't so tremendous to his home folks if a lad fly to New York and back! To work up a name as a traveller, go around the world at least twice!—Detroit News.

Would Encourage Use Of Canadian Barley

To Replace Foreign Grown Corn In Livestock Feed

Steps taken to encourage use of Canadian barley in livestock feeding were described by Hon. Robert Weir, Minister of Agriculture, when the resolution of the Saskatchewan Board of Trade was referred to him. The resolution asks the government to insure the use of Canadian grown barley rather than foreign grown corn in livestock feeding.

Last fall, after tests had been conducted, the department here sent out tables showing how barley could be advantageously used for feeding both poultry and livestock. The tests proved barley to be very suitable as compared with corn.

One of the disadvantages has been that the 7,000,000 or 8,000,000 bushels of barley stored at the Head of the Lakes contained considerable other seeds including weed seeds. The farmers feeding livestock in the eastern part of Canada objected to this because of the danger of the weeds being spread on their own farms.

Record Butterfat Test

High-Producing Jersey Cow Owned By Alberta Man

What is believed to be a record butterfat test for a cow of any age or breed is claimed by Norman S. Clarke of Didsbury, for the three-year-old Jersey cow "Waikiki Zenia's Fanny," which, in official R.O.P. test for the past 60 days, made a test of 9.8 per cent.

This high-producing cow is one of the choice animals purchased last year by Mr. Clarke in the state of Washington, and added to his herd at Didsbury. The butterfat content of the milk, which is exceptionally high for even a cow of this breed, is certified by F. King of the Dominion Government cow-testing staff.

At this rate, the Clarke cow, in her average flow of two gallons of milk per day, produces sufficient butterfat to make approximately 2½ pounds of butter.

Overseas Air Route

Negotiations are still proceeding between Imperial Airways and Canadian aviation concerns with a view to establishing a regular service with giant flying boats between England and Canada, according to the air correspondent of the London Daily Herald. Experts have already collected full details regarding meteorological conditions, the newspaper declares.

According to census figures just released, Java has 821 people per square mile.

Counterfeiting of coins was an underworld "racket" in provinces of the Roman Empire.

Hog Market Is Bright

Optimistic View Is Taken Of Situation For Present Year

The eleventh annual live stock market and meat trade review of the Dominion Live Stock Branch takes an optimistic view of the hog market for the current year.

With regard to 1930, the review observes, "hogs claimed most of the limelight during the year and all things considered, gave a star performance." The revenue from hogs was much smaller than the previous year because the volume of output was much lighter.

With respect to the prospects for 1931, it states "the increase in production which is pending should be in the interests of the industry, providing of course that the strictest care is taken to breed to the recognized bacon type and to feed and finish properly."

During the calendar year 1930, a total of 904,439 hogs were sold on Canadian stock yards. Winnipeg heads the list with a total sales of 242,063 hogs.

During the past year a higher percentage of hogs marketed qualified for the "select bacon" premium than at any time during the past five years.

Will Move Beaver

Owing To Water Shortage In British Columbia, Beaver Will Be Relocated

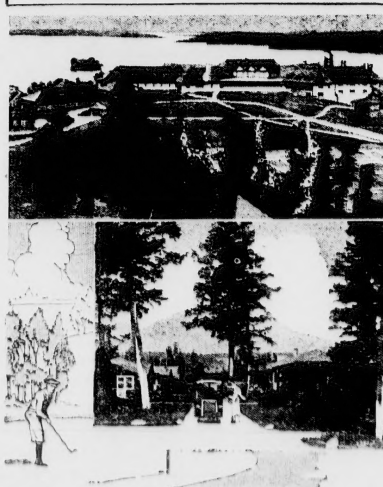

The wholesale destruction of Beaver has created a serious shortage of water in some parts of the interior of British Columbia, according to reports received by the government. To repair this damage and make sure that more beaver dams are built to maintain water supplies, the government will trap large numbers of beaver in the Bowron Lake country, east of Barkerville, next fall and turn them loose in the Cariboo country, where they are extremely scarce.

British Columbia Has Reforestation Plan

Is Planting Young Fir Trees On Reserved Land

Fifteen thousand two-year-old fir trees were planted recently on logged off land situated on the old Interior timber claims near Campbell River, a Boyron Lake country, east of Barkerville, next fall and turn them loose in the Cariboo country, where they are extremely scarce.

WELL-KNOWN SUMMER RESORTS

It is said that Canadians are in the minority when it comes to knowing their own playgrounds. Be this as it may, figures reveal that the number of persons entering Canada for vacation purposes shows an annual increase. Canada has much to offer to the tourist in the way of resorts, and Jasper National Park, and Minkai in the Lake of the Woods region, are among those internationally well known for holiday seekers. The Canadian National Railways maintain high class hotels at these resorts—Jasper Park Lodge, open June 1st to September 30th, and Minkai Lodge, from June 20th to September 7th. The top scene is a view of Minkai Lodge; the bottom is a row of bungalows at Jasper.

Valuable Contributions Made To The World By The Dominion In Comparatively Recent Times

Butter Output In Saskatchewan Higher

Ninety-Three Per Cent. Increase Over April Last Year

Production of creamery butter in Saskatchewan, during April, showed a 93 per cent. increase over the output for the corresponding month of 1930, and boosted the percentage increase for the year to date, to 81.3 per cent.

During April, 1931, production recorded in the dairy branch of the Saskatchewan Department of Agriculture, reached a total of 1,562,179 pounds, as compared with 762,338 pounds in April, 1930, an increase of 659,843 pounds, or 93.1 per cent.

The increase was most marked in the northern section of the province where the recorded gain was 126.1 per cent. over the April, 1930, figures. In the central section, the increase was 90 per cent., and in the southern, 80 per cent.

From January 1 to April 30, 1931, the output aggregated 4,331,904 pounds as compared with 2,389,352 pounds for the corresponding period of last year, the gain of 1,942,552 pounds representing a percentage increase of 81.3.

Use Of Combines

Big Saving Effect In Combine Method Of Harvesting Grain

According to the annual report of the Director of the Dominion Experimental Farms there were 85,000 tractors in Western Canada in 1929. The report adds: "The introduction of the combine method of harvesting grain has also reduced the time required and the cost of harvesting grain. Starting from one machine which was introduced and experimented with on the Dominion Experimental Station at Swift Current, Sask., in 1922, there are now located in the three provinces a total of 7,726 combines. These savings in labor have reduced the cost of growing crops. The use of the combine alone, as compared to the binder and thrasher method, has effected a saving of approximately 9 cents per bushel on a 20-bushel crop."

In order to avoid cutting down a grove of cottonwood trees, a new railway line being built in Texas is making a detour from its original survey.

A compilation has been made by a Canadian newspaper of some of the contributions to world progress made by the Dominion in comparatively recent years and the following are noted:

Canada built and demonstrated the first railway sleeping cars.

Built and sent the first steamship across the Atlantic.

Gave to the world the idea of the all-electric radio.

Originated the idea of making paper from pulwood.

First isolated helium gas in commercial quantities.

Originated the idea of the panoramic camera.

Originated the idea of electric heating.

Built the world's first electric stove.

Originated Marquis and other more recent wheats, which helped to build up the commerce of the West, both in Canada and the United States.

The idea of the telephone originated in Canada, and the first long-distance trials of the instrument were in Ontario between Paris, Ont., and Brantford.

Canada pioneered in the field of electro-chemistry with the discovery of calcium carbide by Tom Wilson, of Hamilton.

Canada originated the idea of standard time, which has since been adopted by every civilized country in the world.

Canada built and demonstrated the first submarine telegraph in the history of the world.

A Canadian physician, Mr. F. G. Bantling, of Toronto, discovered insulin, a serum for the treatment of diabetes.

Canada built and demonstrated the first compound steam engine in the history of the world. The effect of this invention was the doom of the sailing ship as a factor in ocean commerce.

Tuberculosis Tests

Saskatchewan Occupies Envious Position—Reactor Tests Show

Second only to Prince Edward Island in the health of its cattle from the standpoint of tuberculosis, Saskatchewan occupies an enviable position, recent reactor tests being conducted show.

Out of 13,165 head of cattle recently tested in the five municipalities of Indian Head, 156; South Qu'Appelle, 157; Edenwold, 158; Sherwood, 159; and Lumsden, 160, only 164 reactors were reported, or 1.2 per cent. of the total.

Reactors to the test in the various provinces of the Dominion range from 4 per cent. to nine per cent.

The testing work is being carried out by the Department of Agriculture working in conjunction with the Dominion Department. The veterinarians are supplied by the health of animals branch, Ottawa, and Dr. M. Fowler, chief inspector is in charge of the work.

Ancient City Of Ur

Discovery of a tablet which is said to provide the first evidence that the ancient city of Ur of the Chaldees was inhabited as late as 324 B.C., in the reign of Alexander the Great, was announced by Horace H. F. Jayne, director of the University of Pennsylvania Museum.

"Marconi has achieved the transmission of 4,000 words a minute!"

"My dear Marconi, I have an apparatus that will easily beat that!"

"My wife's voice!"—H 420, Florence.

JENKINS' GROCETERIA

Where You Get Good Things To Eat.

Owing to wet weather in B.C. we were unable to get our orders for strawberries fulfilled. We expect a big shipment this week or next from the famous Creston district. Raspberries will be coming in next week also and we advise you to get the early pack and get them done.

Mountain View Notes

A church service was held in Community Hall on Sunday evening, June 21st, at 8 p. m. which was well attended. Mr. Warren gave a very able address on the importance of living the christian life and how men and women are drawn towards a truly genuine christian.

July 1st promises to be a real day in the town of Didsbury and the business men of that town appear to be going to a great deal of trouble and expense to make the picnic a success.

The surrounding district has developed an emerald appearance since the clouds poured forth their waters upon the thirsty, dried out land. Gardens are beginning to show the beneficial results also. Several housewives were busy correlling wee turkeys and chickens as several coops happened to be in laying areas. However in spite of getting thoroughly saturated no one grumbled about the mud, muddy roads, or absence of King Sol for a day or more as his rays had been too powerful.

Burnside Notes

Mrs. Walter was a Sunday visitor at Mr. and Mrs. W. McCulloch's.

Mr. Ralph Long, of Aene was visiting Mr. and Mrs. Eckel on Sunday.

Mr. and Mrs. Jim McCulloch were Sunday evening visitors at Mr. Sam Elliott's.

Miss M. Reimer returned on Monday to her home in Louisiana after spending a week with Miss Mildred Cipperley.

Mr. and Mrs. Alfred Hayes and four children, of California arrived last week to visit Mrs. Hayes' mother, Mrs. Owens and other relatives here.

Don't forget the annual picnic of Burnside U.F.A. on Tuesday, June 30th. Sports of all kinds. Hot Dogs for sale at supper time and dance at night.

Miss Dorothy Cipperley, of Didsbury, Mr. Bob Spragg, of Hythe, Alberta, Mr. and Mrs. A. E. Thompson, senr. and family and Mr. and Mrs. A. E. Thompson, junr. were Sunday visitors at Mr. and Mrs. Clarence Cipperley's.

"Pioneer" Want Ads. bring results

Melvin Notes.

Miss Evelyn White is spending some time at home.

Mr. and Mrs. A. Krebs motor-ed to Calgary on Monday.

Mrs. Cliff Gibbs visited with Mrs. John Clarke Wednesday.

Rugby W.I. sewing course is being held at Mrs. John Clarke's this week.

The Dog Pound is the centre of attraction again this summer as many swimmers are there every day.

Several from this district were visitors at Sundre Stampede. On account of bad roads caused by the welcome rains, some people found it rather difficult to get home.

SOFTBALL

At the beginning of the week an exciting softball game was played at the home of H. Gibson between the Hammer team, coached by W. Hammer and the newly organized team, "Budding Biffers," coached by R. St. Clair. A decisive victory was gained by the latter team, the score being 32-28. In spite of the state of the roads there was excellent support. The line-up was as follows:

Hammer: Grace Hammer, capt., Hazel Soper, Dorothy Calahan, Vera McEachern, Julia Gilbertson, Gladys Scott, Irene Allen, Mrs. Noble, Vera Sahlin, and Beverly Munson.

Budding Biffers: Jessie Fulkerth, capt., Gina Percy, Marjorie Birdsell, Gertrude Morrison, Daisy Gibson, Helen Mullen, Jessie Munro, Dorothy Morrison and Hilda Birdsell. Umpire: Ollie Fisher.
